1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

Claim 1:

Line 9, "to one of a plurality of selected phases of the external reference clock" has been deleted.

Claim 14:

Lines 7-8, "to one of a plurality of selected phases of the external reference clock" has been deleted.

The changes have been made in order to language of the plurality of internal clock signals and to place the application in a condition for allowance.

2. The following is an examiner's statement of reasons for allowance: the amendment filed 3/14/2005 has overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest each of the plurality of secondary phase lock circuits has inputs of the plurality of internal clocks and the external reference clock signal, and each secondary phase lock circuit produces a clock select digital code for selecting a particular one of the generated plurality of internal clocks as called for in claims 1 and 14. Therefore, claims 1-2, 4-5, 7-15, 17-18 and 20-26 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
